Your 8-step IELTS method — session breakdown

Used on Wednesday (Task 2) and Friday (Task 1). Friday: skip Step 7. Use that 5 minutes for trend vocabulary instead.

Step	Time	What you do	IELTS payoff
1	0–8 min	Write a paragraph on a random topic (Task 2 style). No help, no revision — timed first draft.	Replicates real exam pressure. Most students never practise this raw.
2	8–18 min	Paste into Claude: 'Fix grammar, coherence, and IELTS band issues. Explain every change.'	Targeted error identification. Builds self-editing reflex over weeks.
3	18–23 min	Read the revised version aloud slowly. Note every change — underline or write them down.	Reading comprehension of restructured argument. Internalises correct patterns.
4	23–28 min	Ask Claude: 'Give me 5 IELTS-style True/False/NG questions using paraphrased vocabulary.'	Trains synonym recognition — exactly what IELTS Reading tests.
5	28–36 min	Answer all 5 questions in writing. Do NOT re-read the paragraph. Recall only.	Recall under constraint. Builds answer precision and reading discipline.
6	36–42 min	Paste answers into Claude: 'Check accuracy against the text and fix grammar errors.'	Feedback loop on comprehension errors specifically — not general grammar.
7	42–47 min	Record yourself summarising the paragraph in 60–90 seconds. Phone voice memo is fine.	Speaking fluency, coherence, and pronunciation awareness.
8	47–52 min	Play it back. Transcribe 2–3 sentences. Paste into Claude: 'Fix fluency and grammar issues.'	Listening to yourself critically — mirrors IELTS Speaking self-monitor skill.

IELTS daily resources — free, immediate, no books needed

Day	Skill	Free resource (clickable)	What to do with it
Monday	Reading	ieltsonlinetests.com — Academic Reading	1 Academic Reading passage. Strict 20 min. Analyse every wrong answer before moving on.

Day	Skill	Free resource (clickable)	What to do with it
Tuesday	Listening	British Council — Free Listening Tests	Download question paper first. One full section. No pausing. Re-listen to every missed question.
Wednesday	Your method (Task 2)	ieltsliz.com — Task 2 topics list	Pick ONE topic. Run full 8-step method (52 min). AI for Steps 2,4,6,8 only.
Thursday	Reading (harder)	ieltstestsimulation.com — Cambridge tests	Cambridge 17–19 passage. Strict 20 min. Focus on True/False/Not Given question type.
Friday	Your method (Task 1)	ieltsliz.com — Task 1 charts & graphs	Pick ONE chart. Run Steps 1–6. Skip Step 7. Spend remaining time on trend vocabulary.
Saturday	Full section	ielts-up.com — Full Listening tests	Odd weeks = full Listening (all 4 sections). Even weeks = full Reading. No pausing.
Sunday	Error review + Writing check	LexiBot — Free IELTS writing checker	Error log review. Find 1 recurring pattern. Submit Wednesday Task 2 to LexiBot for band score.

- Error log: after every session, write 1–3 lines — question type, why you got it wrong, what to watch for. Review every Sunday.
- For your method sessions: use Claude only for Steps 2, 4, 6, and 8. Steps 1, 3, 5, and 7 without AI.
- LexiBot (Sunday): submit your Wednesday Task 2 for a band score across all 4 marking criteria.

Swedish learning plan — A1 → B1 (months 1–20)

You are starting at A1 now. Use only A1 tools until you hit the switch signal in the phase table below.

Phase overview

Phase	Timeline	What changes	Key switch signal
A1	Months 1–4	Workbook + Duolingo + SVT Nyheter + self-talk	You understand most of SVT Nyheter without subtitles → move to A2
A2	Months 5–10	Anki replaces Duolingo · 8sidor.se · Tandem text · SVT Play real content · Claude writing partner	You can write a paragraph in Swedish without stopping → move to B1
B1	Months 11–20	Radio Sweden · Aftonbladet · Tandem voice · Clozemaster · FluencyDrop · svenska.se	You arrive in Sweden. Full immersion takes over from this point.

Full resource breakdown

Phase	Skill	Tool	Free resource	How to use it in your session
A1 Mon 1–4	**Grammar**	Your workbook	Physical workbook (not free — buy once)	Open before every session. Alphabet → nouns → pronouns → verb groups 1–3. Write every exercise by hand.
A1 Mon 1–4	**Vocab**	Duolingo	duolingo.com	Streak = daily minimum. 5–10 min. Don't rely on it for grammar. Keeps new words warm.

Phase	Skill	Tool	Free resource	How to use it in your session
A1 Mon 1–4	**Listening**	SVT Nyheter på lätt svenska	svtplay.se	Daily 5-min easy news with Swedish subtitles. Watch without subs first, then turn them on.
A1 Mon 1–4	**Speaking**	Self-talk (no app)	No app — just your voice	Narrate your day in Swedish aloud. 10 min daily beats 1hr weekly for fluency.
A2 Mon 5–10	**Vocab**	Anki — Swedish deck	ankiweb.net	Replace Duolingo with Anki. Download Top 2000 words deck. 20 new cards/day, review daily.
A2 Mon 5–10	**Reading**	8sidor.se	8sidor.se	Real Swedish news in simplified Swedish. Read + listen to one article daily. Audio is essential.
A2 Mon 5–10	**Speaking**	Tandem app	tandem.net	Find a Swedish native learning Turkish or English. Exchange 15 min each. Text first, then voice.
A2 Mon 5–10	**Listening**	SVT Play — real content	svtplay.se	Upgrade to real programmes. Start with children's shows (Bolibompa). Natural pace, simple vocab.
A2 Mon 5–10	**Writing**	Claude as writing partner	Claude (this chat)	Write 3–5 sentences daily. Paste into Claude: 'Fix grammar, explain each error.' Same loop as IELTS.
B1 Mon 11–20	**Listening**	Radio Sweden på lätt svenska	sverigesradio.se	Sveriges Radio 5-min daily news podcast. More formal register — better B1 prep for Lund.
B1 Mon 11–20	**Reading**	Real Swedish news	aftonbladet.se	Aftonbladet and Expressen are free. One article per week. Look up max 10 words.
B1 Mon 11–20	**Speaking**	Tandem — voice calls	tandem.net	Upgrade from text to voice. 20–30 min sessions. Prepare topics: Lund, astrophysics, your plans.
B1 Mon 11–20	**Vocab**	Clozemaster	clozemaster.com	Fill-in-the-blank with real Swedish sentences. Free tier: 30 sentences/day. Replaces Anki at B1.
B1 Mon 11–20	**Writing**	FluencyDrop — graded stories	fluencydrop.com	B1-level stories with audio + AI speaking feedback. Read, listen, retell in your own words.
B1 Mon 11–20	**Grammar**	svenska.se — official dictionary	svenska.se	Official Swedish Academy dictionary — free and authoritative. Full conjugation tables. Bookmark it.

- A1 daily minimum: workbook 10 min + Duolingo 5 min + SVT Nyheter 5 min + self-talk 5 min = 25 min.
- A2 daily minimum: Anki 10 min + 8sidor article 10 min + Claude writing 5 min = 25 min.
- B1 daily minimum: Radio Sweden 5 min + Clozemaster 10 min + vocabulary journal 5 min = 20 min.

Maths & Physics self-study track — Lund University preparation

This track runs in parallel with everything else. It is the single most important addition to the plan. The computational astrophysics project gets you in the door. This track determines whether you survive Year 1 once you're there.

Textbooks — what to get and when

Book	Phase	Difficulty	What it covers and why you need it
Halliday, Resnick & Krane — Physics Vols 1 & 2	Phase 1 (now)	★★★☆☆	University-level intro physics. Mechanics, waves, thermodynamics, EM, optics. Problems are rigorous. This is what Lund Year 1 is based on. Work through Vols 1–2 systematically.
Boas — Mathematical Methods in the Physical Sciences	Phase 1 (now)	★★★★☆	The standard mathematical methods book for physics undergrads worldwide. Ch 1–4: infinite series, complex numbers, linear algebra, vectors. Ch 7–8: Fourier series, ODEs. Work alongside Halliday.
Griffiths — Introduction to Electrodynamics	Phase 2 (after IELTS)	★★★★☆	The best EM textbook at this level. Ch 1–3 covers all the EM you need for Year 1 at Lund. Not optional if you want to survive the EM module.
Griffiths — Introduction to Quantum Mechanics	Phase 2 (after IELTS)	★★★★★	Ch 1–2 only: the wave function, Schrödinger equation, particle in a box, harmonic oscillator, free particle. This is exactly what Lund Year 1 QM begins with. Reading ahead here is enormously valuable.

- Halliday is available as a free PDF online — search 'Halliday Resnick Krane Physics PDF'. Buy it if you can; the problems are easier to navigate in print.
- Boas is also widely available as a PDF. This is the most important book in the list — do not skip it.
- Griffiths EM and QM are both available legally free through many university library open access portals. Search your school or public library network.

Phase map — what to study and when

Phase	Duration	Halliday chapters	Boas chapters
Phase 1	Now → IELTS exam (~8 months)	Vol 1: Mechanics (Ch 2–14) → Waves and oscillations (Ch 15–17) → Thermodynamics (Ch 18–21)	Ch 1: infinite series · Ch 2: complex numbers · Ch 3: linear algebra · Ch 4: vector analysis
Phase 2	After IELTS → arrival at Lund (~10 months)	Vol 2: Electromagnetism (Ch 22–32) → Optics (Ch 33–36) → Then Griffiths EM Ch 1–3	Ch 7: Fourier series · Ch 8: ODEs · Then Griffiths QM Ch 1–2

Weekly session schedule — where the time comes from

30 min added to weekday evenings (22:10–22:40 Mon–Fri) by shortening the Monthly Task light-review slot. 45 min on Saturday by using the first part of what was previously free time. 30 min on Sunday by replacing the old arxiv slot (arxiv moves to 20:45–21:05). Total: ~3.75h/week.

Monthly Task deep work is NOT reduced. Only the light Mon–Wed review slot (was 50 min, now 20 min) and Thu–Fri deep work (was 100 min, now 70 min) are adjusted. This keeps ~10.5h/week of real Monthly Task work intact.

Day	Time slot	Duration	What to do
Monday	22:10 – 22:40	30 min	Halliday problem set — 3 problems from the current chapter. Write full working by hand. Don't use calculator for algebra. Check answers after all 3.
Tuesday	22:10 – 22:40	30 min	Boas — read one section and do 4–5 exercises. Mathematical methods only: no physics context needed. Focus on getting the manipulation right.
Wednesday	22:10 – 22:40	30 min	Halliday — read the next chapter section. Mark key equations and derivations. Write the derivation yourself without looking. Don't just read — reproduce.
Thursday	22:10 – 22:40	30 min	Boas problem set — 4–5 problems from the section you read on Tuesday. These are harder than Halliday mathematically. Take your time.
Friday	22:10 – 22:40	30 min	Mixed review — pick 2 Halliday and 2 Boas problems from any chapter in the current block. No hints. Timed. This is exam simulation.
Saturday	17:30 – 18:15	45 min	Weekly deep problem session — attempt 1 hard Halliday proof-style problem. Work it fully: setup, free-body or field diagram, full algebra, check dimensions and limits. This is the most important session of the week.
Sunday	20:15 – 20:45	30 min	Weekly review — re-read your own notes from Mon–Fri. Write a one-page summary of what you covered. Note which problem types you still find hard. This replaces the old arxiv slot, which moves to 20:45–21:05.

How to use a physics textbook — the method

Reading a physics textbook is not like reading a novel. If you read without solving problems you will feel like you understand everything and solve nothing under exam conditions. The method below is the correct approach.

Step	Action	What this looks like in practice	What NOT to do
1	Read the chapter section	Read slowly. When a derivation appears, cover it and try to re-derive it yourself before reading the solution.	Don't just read through passively. If you can't reproduce a derivation, you don't understand it yet.
2	Write key equations in your own notation	Copy equations into your notebook, but write the physical meaning of every symbol next to it.	Don't just copy. If you can't say what every variable means physically, the equation is decoration.
3	Attempt problems before checking solutions	Set a timer. Attempt the problem fully. Only look at the solution after you have a complete answer or are genuinely stuck after 20 minutes.	Don't read the solution first and then convince yourself you understood it. That is not learning.
4	Check dimensions and limiting cases	After every answer: (a) check units are consistent, (b) check what happens in extreme cases (mass → 0, distance → ∞). If the answer breaks, the derivation has an error.	Don't stop at a numerical answer. The dimensional check and limiting case analysis are how physicists verify their own work.
5	Log errors and revisit	When you get a problem wrong, write down exactly which step failed. On Sunday review, redo that class of problem from a different angle.	Don't move on from a wrong answer by reading the solution and nodding. You must be able to do the same class of problem from scratch a week later.

- Problem quota: 15–20 Halliday problems + 15–20 Boas exercises per week. At this pace you complete each chapter in 2–3 weeks. Over 18 months you will cover both Phase 1 and Phase 2 comfortably.
- When you are stuck for more than 20 minutes: write down exactly where you are stuck (which equation, which step), then look at the solution for that step only. Cover the rest and continue yourself.
- Do not switch to a different problem when one is hard. Hard problems are the ones that build analytical fluency. Easy problems confirm what you already know.
- Exam simulation matters: every Friday mixed review and every Saturday deep session should be done under timed conditions with no hints. This is how you find out if you actually understand something.

Monday — Wednesday (training days)

IELTS: Mon = Reading | Tue = Listening | Wed = 8-step method. Training: Mon = Push | Tue = Pull | Wed = Legs. Maths: Mon = Halliday problems | Tue = Boas read+exercises | Wed = Halliday read+derivation.

Time	Block	Focus / Notes
17:30 – 18:45	**Lessons**	Core school subjects — highest priority block
18:45 – 19:15	**Swedish**	MON: Workbook exercise + Duolingo streak | TUE: Workbook + SVT Nyheter (5 min) | WED: Self-talk 10 min + Duolingo [A1 — see Swedish resource table]
19:15 – 20:00	**IELTS**	MON: Reading (ieltsonlinetests.com) | TUE: Listening (British Council) | WED: 8-step method — Task 2 (ieltsliz.com)
20:00 – 21:00	**Training**	MON: Push | TUE: Pull | WED: Legs & Abs — warm-up at 20:00 sharp
21:00 – 21:45	**Meal + recovery**	Protein within 30 min of session end; light chat with girlfriend
21:45 – 22:10	**Shower + reset**	Transition block
22:10 – 22:40	**Maths / Physics**	MON: Halliday problem set (3 problems) | TUE: Boas — read + 4–5 exercises | WED: Halliday — read section + reproduce key derivation
22:40 – 23:00	**Monthly Task**	Light only: re-read notes, plan tomorrow — 20 min

Thursday — Friday (deep work days)

IELTS: Thu = Reading harder | Fri = 8-step method Task 1. Maths: Thu = Boas problem set | Fri = Mixed timed review. Monthly Task reduced to 70 min deep work (was 100 min).

Time	Block	Focus / Notes
17:30 – 19:00	**Lessons**	Main school study block
19:00 – 19:30	**Meal**	Step away from desk completely
19:30 – 20:00	**Swedish**	THU: Tandem text (A1) → Tandem voice call (A2+) | FRI: SVT Nyheter (A1) → SVT Play (A2+)
20:00 – 20:50	**IELTS**	THU: Reading harder passage (ieltstestsimulation.com) — T/F/NG focus | FRI: 8-step method — Task 1 (ieltsliz.com)
20:50 – 22:00	**Monthly Task**	Deep work — implementation / physics / debugging — 70 min
22:00 – 22:30	**Maths / Physics**	THU: Boas problem set (4–5 problems) | FRI: Mixed review — 2 Halliday + 2 Boas problems, timed, no hints
22:30 – 23:00	**Girlfriend + shower**	Protected daily connection + hygiene reset

Saturday (biggest project day + maths deep session)

17:30–18:15 is now the weekly maths deep problem session. Free time shifts to 18:15–19:00 (45 min unstructured). Saturday evening fully protected.

Time	Block	Focus / Notes
09:00 – 09:30	**Breakfast**	Gentle start — no screens
09:30 – 11:30	**Monthly Task**	Deep work block 1 — best cognitive hours of the week
11:30 – 11:50	**Break**	Walk / water / reset
11:50 – 13:00	**IELTS — full section**	Odd weeks: full Listening (ielts-up.com) | Even weeks: full Reading (ieltsonlinetests.com) — no pausing
13:00 – 14:00	**Meal + rest**	Recovery — messages, girlfriend, light chat
14:00 – 15:30	**Lessons**	School subjects catch-up or advance study
15:30 – 15:50	**Break**	Short reset
15:50 – 17:00	**Swedish**	A1: SVT Nyheter + workbook chapter | A2: SVT Play + 8sidor + Claude writing | B1: FluencyDrop + Tandem call
17:00 – 17:30	**Monthly Task**	Quick documentation — commit to GitHub
17:30 – 18:15	**Maths / Physics**	Weekly deep problem session — 1 hard Halliday proof-style problem, full working by hand
18:15 – 19:00	**Free time**	Girlfriend / walk / relax — unstructured
19:00 – 19:30	**Shower + meal**	Reset
19:30 – 20:30	**Meal**	Dinner — social or family time
20:30 – 23:00	**Social / girlfriend**	Protected free evening — no study at all

Sunday (catch-up, error review, and rest)

20:15–20:45: maths weekly review (replaces old arxiv slot). Arxiv moves to 20:45–21:05 — same 20 min, just shifted by 30 min.

Time	Block	Focus / Notes
09:00 – 09:30	**Breakfast**	Gentle start
09:30 – 10:45	**Lessons**	Core school study
10:45 – 11:00	**Break**	Reset
11:00 – 12:30	**Monthly Task**	Main project block — coding / physics / writing
12:30 – 13:30	**Meal + rest**	Recharge
13:30 – 14:00	**Swedish**	A1: Re-read workbook notes + Duolingo | A2: 8sidor article | B1: Aftonbladet or Radio Sweden
14:00 – 15:00	**IELTS — error review**	Error log review. Find 1 pattern. Submit Wed Task 2 to LexiBot for band score.
15:00 – 15:20	**Break**	Step outside
15:20 – 16:30	**Monthly Task / catch-up**	Finish unfinished work — write notes, commit to GitHub
16:30 – 18:00	**Free time**	Girlfriend / relax / social

Time	Block	Focus / Notes
18:00 – 18:30	**Shower**	Reset block
18:30 – 19:30	**Meal**	Dinner
19:30 – 20:15	**Weekly review**	Progress vs checklist · plan next week · update GitHub log
20:15 – 20:45	**Maths / Physics review**	Re-read this week's notes. Write one-page summary. Flag problem types still causing errors.
20:45 – 21:05	**Arxiv reading**	1 astrophysics abstract or blog post — 20 min only
21:05 – 23:00	**Rest / social**	Low-pressure close to the week

Weekly totals — all streams

Stream	Weekday total	Weekend total	Weekly total
Monthly Task	~6.5h	~5.5h	**~12h**
IELTS	~4h	~3h	**~7h**
Lessons	~7h	~2.75h	**~9.75h**
Swedish	~2.5h	~1.5h	**~4h**
Maths & Physics	~2.5h (Mon–Fri)	~1.25h (Sat+Sun)	**~3.75h**
Training (PPL)	~3h	—	**~3h**
Free / social	~1h	~5.75h	**~6.75h**

Fallback rules

- Hard school day: shorten IELTS to 30 min first. Keep monthly task, maths, and sleep protected.
- Very hard day: skip Swedish only. Make it up Saturday. Everything else stays.
- Extremely hard week: if something must go, drop the Saturday maths session only — not the weekday 30-min slots. Consistency on the small daily sessions matters more than any single long session.
- Method session running long: cut at Step 6. Steps 7–8 can be done another day.
- Saturday morning monthly task (09:30–11:30) is the most protected block of the week.
- Weekend disruption: recover Monthly Task first, then IELTS, then Maths, then Swedish. In that order.
- Missed training session: skip it and continue the rotation. Never stack two sessions.

PART 2 — PPL TRAINING PROGRAM

Monday = Push · Tuesday = Pull · Wednesday = Legs & Abs · 20:00–21:00 · Thu–Sun no lifting

---

Equipment inventory & max loads

Equipment	Max load	Primary use in this program
Barbell (2kg bar)	38kg total	OHP, bench press, bent-over row, squat, RDL, deadlift, hip thrust, curl
Dumbbells (2×2kg bars)	19kg each	Incline press, single-arm row, lateral raise, Bulgarian split squat, rear delt fly, curl
Kettlebells	2 / 6 / 8kg	KB swing (8kg), goblet squat (8kg), accessory grip/carry work
Backpack	20–25kg+	Weighted pull-ups, dips, push-ups, step-ups — load plates for progressive overload
Adjustable bench	—	Flat / incline press, Bulgarian split squat rear foot, DB row support, hip thrust
Power twister (30kg)	30kg	Push day finisher — pec/front delt pump. Also usable as shoulder warm-up.
Hand gripper (5–60kg)	60kg	Pull day finisher — grip strength and forearm development. Always do last.

Loading quick-reference

Target	Plate configuration	Result
BB ~10kg	2kg bar + 2×1kg + 2×1kg each side	**= 10kg**
BB ~22kg	2kg bar + 2×5kg each side	**= 22kg**
BB ~27kg	2kg bar + 2×5kg + 2×2.5kg each side	**= 27kg**
BB max 38kg	2kg bar + all available plates	**= 38kg**
DB ~8kg	2kg bar + 1×2.5kg + 1×1kg each side	**= 8kg each**
DB ~12kg	2kg bar + 1×5kg each side	**= 12kg each**
DB max 19kg	2kg bar + max load 17kg per bar	**= 19kg each**

Warm-up protocol — do this before every session

Day	Duration	General (3 min)	Specific ramp-up (3–5 min)
Push	6–8 min	Arm circles, shoulder CARs, band pull-aparts ×20, scapular push-ups ×10	Power twister ×10 slow reps, then 2 ramp sets OHP at 50% and 75%
Pull	6–8 min	Cat-cow ×10, dead hang 30 sec, scapular pull-ups ×10, hip hinges ×10	2 ramp sets of bent-over row at 50% and 75%
Legs	8–10 min	Leg swings, hip circles, ankle rolls, BW squats ×15, RDL ×10	2 ramp sets squat at 50% and 75%. Pigeon stretch 30 sec each side.

- Never skip warm-up sets on the first compound lift.
- Warm-up sets do not count as working sets.

Day A — PUSH · Monday · 20:00–21:00

Muscles worked: Chest · Shoulders (anterior & medial deltoid) · Triceps

Primary strength indicator: Barbell Overhead Press — log every session

Session timeline

Clock	Duration	Phase	What's happening
20:00	3 min	**General warm-up**	Arm circles, band pull-aparts ×20, scapular push-ups ×10, shoulder CARs
20:03	4 min	**Specific ramp-up**	OHP with empty bar ×10, then 50% ×5, then 75% ×3 — not working sets
20:07	12 min	**OHP — 4 working sets**	Your hardest compound. Log every set. 2–3 min rest.
20:19	10 min	**Incline DB Press — 4 sets**	Switch to incline bench. 90 sec rest.
20:29	9 min	**Flat Barbell Bench — 3 sets**	Flat bench. 90 sec rest.
20:38	8 min	**Weighted Dips — 3 sets**	Load backpack. 90 sec rest.
20:46	6 min	**Lateral Raise — 3 sets**	60 sec rest. Light weight, strict form.
20:52	5 min	**Overhead Tricep Ext — 3 sets**	60 sec rest. Full stretch at bottom.
20:57	2 min	**Weighted Push-Up — 2×max**	Backpack on. Log reps.
20:59	1 min	**Power Twister finisher**	3×15 slow arcs.

Exercise breakdown

Compounds: 2–3 min rest. Isolation: 60 sec. Finishers: 45–60 sec.

#	Exercise	Muscle target	Sets × Reps	Load / Setup	Rest	Key cue
— COMPOUND BLOCK (2–3 min rest) —						
1	**Barbell Overhead Press (OHP)**	Anterior delt · Triceps · Upper chest	4 × 5–6	BB: 18–22kg	2–3 min	Full lockout. No elbow flare. 2 sec descent.
2	**Incline Dumbbell Press**	Upper pecs · Anterior delt · Triceps	4 × 8–10	DBs: 11–14kg each	90 sec	Bench 35°. Touch chest lightly, squeeze top.
3	**Flat Barbell Bench Press**	Mid pecs · Anterior delt · Triceps	3 × 8–10	BB: 22–30kg	90 sec	Scapula retracted. Bar to lower chest.
4	**Weighted Dips (backpack)**	Lower chest · Triceps · Front delt	3 × 8–12	BPK: 10–20kg	90 sec	Lean fwd for chest. Upper arms parallel.
— ISOLATION BLOCK (60 sec rest) —						
5	**Dumbbell Lateral Raise**	Medial deltoid	3 × 12–15	DBs: 6–8kg each	60 sec	Lead elbows not wrists. Slight fwd lean.
6	**Overhead Tricep Extension (DB)**	Long head of triceps	3 × 12–15	1 DB: 11–14kg	60 sec	Elbows close. Full stretch at bottom.

#	Exercise	Muscle target	Sets × Reps	Load / Setup	Rest	Key cue
— FINISHER BLOCK (45–60 sec rest) —						
7	**Weighted Push-Up (backpack)**	Pecs · Anterior delt · Triceps	2 × max	BPK: 10–20kg	60 sec	Full ROM. Chest touches floor. Stop 1 before fail.
8	**Power Twister — Chest Press**	Pecs · Front delt (finisher)	3 × 15	30kg bar	45 sec	Slow arc in, 1 sec pause at close.

Rest guide

Exercise type	Rest period	What to do during rest
OHP / Bench / Dips	2–3 min	Walk, shake arms, set up next weight. Stay standing.
Incline DB Press	90 sec	Re-rack immediately. Note reps before resting.
Lateral raise / Ext	60 sec	Deep breaths. Keep moving.
Push-up / Twister	45–60 sec	Short rest keeps the pump. Quality over quantity.

Session notes

- OHP is your primary strength lift on Push day. Never bounce the bar or use excessive arch.
- Incline DB press at 35° builds upper chest that flat press misses. Don't skip it.
- Dips: if bodyweight is easy, load the backpack immediately. Target: 3×8 with 20kg.
- Lateral raises: go lighter than you think. No work reaches the medial delt if you're swinging.
- Power twister is a finisher only. Not a primary lift.

Progress tracker

Exercise	Week 1	Week 2	Week 4	Week 6	PR
OHP (BB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Incline DB Press (per DB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Flat Bench Press (BB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Weighted Dips (backpack load)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Lateral Raise (per DB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	

Day B — PULL · Tuesday · 20:00–21:00

Muscles worked: Back (lats, rhomboids, traps) · Biceps · Rear deltoid · Grip / forearms

Primary strength indicator: Weighted Pull-Up — log backpack load every session

Session timeline

Clock	Duration	Phase	What's happening
20:00	3 min	**General warm-up**	Cat-cow ×10, dead hang 30 sec, scapular pull-ups ×10, hip hinges ×10
20:03	4 min	**Specific ramp-up**	2 ramp sets of bent-over row at 50% then 75% — not counted
20:07	12 min	**Bent-Over Row — 4 sets**	Primary pull. Log every set. 2–3 min rest.
20:19	12 min	**Weighted Pull-Up — 4 sets**	Load backpack. Dead hang start. 2–3 min rest.
20:31	8 min	**Single-Arm DB Row — 3 sets**	Bench supported. 90 sec rest.
20:39	8 min	**Deadlift — 3×5**	3 heavy sets, 2 min rest. Brace every rep.
20:47	5 min	**KB Swing — 3×15**	60 sec rest. Explosive.
20:52	5 min	**Rear Delt Fly — 3×15**	60 sec rest.
20:57	2 min	**Bicep Curl — 3×10–12**	45 sec rest. 3 sec eccentric.
20:59	1 min	**Hand Gripper — 3×max**	Last thing. 30 sec rest.

Exercise breakdown

Compounds: 2–3 min rest. Power/isolation: 60 sec. Finisher: 30 sec.

#	Exercise	Muscle target	Sets × Reps	Load / Setup	Rest	Key cue
— COMPOUND BLOCK (2–3 min rest) —						
1	**Barbell Bent-Over Row**	Lats · Rhomboids · Rear delts · Biceps	4 × 5–6	BB: 24–32kg	2–3 min	Hinge 45°. Pull to navel. Squeeze lats. 2 sec down.
2	**Weighted Pull-Up (backpack)**	Lats · Teres major · Biceps	4 × 4–8	BPK: 10–20kg	2–3 min	Dead hang start. Elbows to hips. Full extension.
3	**Single-Arm Dumbbell Row**	Lats · Lower trapezius · Rhomboids	3 × 10–12	1 DB: 14–17kg	90 sec	Bench support. Pull to hip. Full stretch at bottom.
4	**Barbell Deadlift**	Erectors · Glutes · Hamstrings · Traps	3 × 5	BB: 28–38kg	2 min	Hip hinge. Bar scrapes shins. Brace hard.
— POWER + ISOLATION BLOCK (60 sec rest) —						
5	**Kettlebell Swing**	Glutes · Hamstrings · Lower back	3 × 15	KB: 8kg	60 sec	Hip drive, not a squat. Bell to hip height.
6	**Dumbbell Rear Delt Fly**	Posterior delt ·	3 × 15	DBs: 4–6kg each	60 sec	Lead elbows out.

#	Exercise	Muscle target	Sets × Reps	Load / Setup	Rest	Key cue
		Infraspinatus				Squeeze rear delts at top.
— FINISHING BLOCK —						
7	**Barbell / DB Bicep Curl**	Biceps brachii · Brachioradialis	3 × 10–12	BB: 12–18kg	45 sec	No elbow drift. 3 sec down.
8	**Hand Gripper — Max Reps**	Flexor digitorum · Forearm flexors	3 × max	60kg setting	30 sec	Do this last. Full close = 1 rep.

Rest guide

Exercise type	Rest period	What to do during rest
Bent-over row / Deadlift	2–3 min	Check lower back feels neutral before re-approaching.
Weighted pull-up	2–3 min	Step off bar. Shake arms. Note reps.
Single-arm DB row	90 sec	Switching sides counts as rest.
KB swing / Rear delt fly	60 sec	Active rest — walk, breathe.
Curl / Hand gripper	30–45 sec	Short rest. Burn is normal. Note max reps.

Session notes

- Deadlift is 3×5 — not 5×5. You are doing it mid-session after rows and pull-ups. Heavy accessory, not primary lift.
- KB swing is a power movement. Every rep explosive. If form breaks, stop the set.
- Rear delt fly is not optional. Neglect it and you get forward shoulder posture and eventual rotator cuff damage.
- Hand gripper at the very end — grip is already compromised. That is when it is most effective.
- Pull-up target: 4×8 with 20kg in backpack by week 12.

Progress tracker

Exercise	Week 1	Week 2	Week 4	Week 6	PR
Bent-Over Row (BB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Weighted Pull-Up (backpack load)	___kg × ___	___kg × ___	___kg × ___	___kg × ___

Deadlift (BB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Bicep Curl (BB or DB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	

Day C — LEGS & ABS · Wednesday · 20:00–21:00

Muscles worked: Quads · Hamstrings · Glutes · Hip flexors · Core

Primary strength indicator: Barbell Back Squat — if the bar feels light, add the backpack

Session timeline

Clock	Duration	Phase	What's happening
20:00	4 min	**General warm-up**	Leg swings ×15, hip circles ×10, ankle rolls, BW squats ×15
20:04	5 min	**Specific ramp-up**	RDL ×10, squat 50% ×5, squat 75% ×3. Pigeon stretch 30 sec/side.
20:09	12 min	**Back Squat — 4 working sets**	Primary lift. 2–3 min rest. Log depth and weight.
20:21	8 min	**Romanian Deadlift — 3 sets**	90 sec rest. Feel the hamstring stretch.
20:29	9 min	**Bulgarian Split Squat — 3 sets/leg**	90 sec after both legs = 1 set.
20:38	6 min	**Goblet Squat — 3 sets**	KB at chest. Deep squat. 60 sec rest.
20:44	7 min	**Hip Thrust — 3 sets**	BB across hips. 60–90 sec rest.
20:51	4 min	**Weighted Step-Up — 3×10/leg**	Backpack on. Full hip extension at top.
20:55	5 min	**Abs circuit × 3 rounds**	Hollow hold → Ab wheel → Leg raise → Side plank. 0 sec between, 90 sec after circuit.

Exercise breakdown

Compounds: 2–3 min. Unilateral/accessory: 60–90 sec. Abs circuit: 0 sec between, 90 sec between rounds.

#	Exercise	Muscle target	Sets × Reps	Load / Setup	Rest	Key cue
— PRIMARY COMPOUND BLOCK —						
1	**Barbell Back Squat**	Quads · Glutes · Adductors · Erectors	4 × 5–6	BB: 24–34kg	2–3 min	Hip crease below parallel. Knees track toes. Hard brace.
2	**Romanian Deadlift (RDL)**	Hamstrings · Glutes · Erectors	3 × 8–10	BB: 26–34kg	90 sec	Soft knee, push hips back. Feel pull. Flat back.
— UNILATERAL + ACCESSORY BLOCK —						
3	**Bulgarian Split Squat (DB)**	Quads · Glutes · Hip flexors	3 × 8–10/leg	DBs: 10–14kg each	90 sec	Rear foot on bench. Front knee over toe. Full depth.
4	**Goblet Squat (KB)**	Quads · Glutes · Core	3 × 12–15	KB: 8kg at chest	60 sec	Heels slightly elevated if needed. Deep squat.
5	**Barbell Hip Thrust**	Glutes · Hamstrings · Hip abductors	3 × 12–15	BB: 20–30kg across hips	90 sec	Upper back on bench edge. Squeeze glutes 1 sec at top.

#	Exercise	Muscle target	Sets × Reps	Load / Setup	Rest	Key cue
6	**Weighted Step-Up (backpack)**	Quads · Glutes · Calves	3 × 10/leg	BPK: 10–15kg	60 sec	Full hip extension at top. Controlled descent.
— ABS CIRCUIT — 0 sec between exercises · 90 sec between rounds —						
7	**Hollow Body Hold**	Rectus abdominis · Transverse abs	3 × 30–45s	Bodyweight	—	Lower back flat. Arms overhead. Breathe normally.
8	**Ab Wheel / Dragon Flag Neg.**	Rectus abdominis · Hip flexors · Lats	3 × 8–12	Bodyweight	—	Ab wheel: full ext. Dragon flag: 4 sec descent only.
9	**Hanging Knee / Leg Raise**	Lower abs · Hip flexors	3 × 10–15	Bodyweight	—	Dead hang. Drive knees to chest or legs horizontal.
10	**Side Plank with Hip Dip**	Obliques · Lateral stabilisers	2 × 15/side	Bodyweight	—	Elbow under shoulder. Dip hip to floor, drive back.

Rest guide

Exercise type	Rest period	What to do during rest
Back squat	2–3 min	Re-rack, walk, check notes. Heaviest sets of the week.
RDL	90 sec	Stay loose. Shake out hamstrings.
Bulgarian split squat	90 sec	Both legs together = 1 set. No rest between legs.
Goblet / step-up	60 sec	Active rest. Burn is expected.
Hip thrust	90 sec	Keep bar loaded across hips during rest.
Abs circuit	0 / 90 sec	Zero rest inside circuit. 90 sec after all 4 exercises = 1 round.

Session notes

- Back squat: depth first, weight second — always. No exceptions.
- Bulgarian split squat: start lighter than you think. Most people use 60–70% of bilateral squat weight.
- Hip thrust is the best single-joint glute movement available. Don't skip it.
- Hollow body hold: if your lower back arches, you are not strong enough for the position yet. Shorten and build.
- Dragon flag negatives: 4-second descent only. Never attempt the upward phase until 3×8 negatives are clean.

Progress tracker

Exercise	Week 1	Week 2	Week 4	Week 6	PR
Back Squat (BB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Romanian Deadlift (BB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Bulgarian Split Squat (per DB)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Hip Thrust (BB load)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	
Hollow Body Hold (seconds)	___kg × ___	___kg × ___	___kg × ___	___kg × ___	

Progressive overload & programming

Log every lift every session. If you cannot say what you lifted last Tuesday, you are not progressing.

Rule	Trigger	Action
Double progression	Hit top of rep range on all sets	Add smallest increment next session
Stay at weight	Can't hit bottom of rep range	Keep same load until all sets reach minimum reps
Backpack loading	Hit max reps on pull-ups/dips	Add 2–4kg to backpack next session
RIR	Every working set	Leave 1–2 reps in tank on compounds. Isolation can go to failure.
Deload	Every 6 weeks	Cut all loads 40% for one week. Return and set new PRs.
Missed session	Any skipped session	Skip it. Continue the rotation. Never stack two sessions.

Nutrition & recovery — 65kg

Variable	Target	Practical guidance
Protein	1.6–2g per kg → 104–130g/day	At 65kg: 104g minimum, 130g strong pace. Eggs, chicken, Greek yoghurt, legumes, dairy.
Total calories	Maintenance or slight surplus	If losing weight unintentionally, add 200–300 kcal/day from carbs — rice, bread, oats.
Post-training meal	Within 30 min of session end	Your 21:00–21:45 block is for this. Protein + carbs together.
Sleep	7.5–8.5 hours	More adaptation in sleep than in the gym. 6h sleep on this workload breaks recovery.
Hydration	2–3L water / day	On training days aim for 3L. Drink before you feel thirsty.

The PPL program runs for 12–16 weeks before a deliberate deload and reassessment. After that, increase starting weights by 10–15% and run it again.
